January 2013

ARTICLES

1. Oster, G. F., Perelson, A. S. and Katchalsky, A. (1971). Network thermodynamics. *Nature* **294**:393-397.

2. Oster, G. F., Perelson, A. S. and Katchalsky, A. (1972). Network thermodynamics: Further comments. *Nature* **237**:332-333.

3. Perelson, A. S. (1972). A Network Thermodynamic Treatment of Coupled Chemical and Diffusional Processes. Doctoral Dissertation, (Thesis Advisor: Aharon Katchalsky, Chairman, Polymer Department, Weizmann Institute of Science, and Professor, Division of Medical Physics, University of California, Berkeley).

4. Perelson, A. S. and Katchalsky, A. (1972). The relationship between the thermodynamic and kinetic reaction diffusion parameters. *Chem. Eng. Sci.* **27**:1190-1192.

5. Auslander, D., Oster, G. F., Perelson, A. S. and Clifford, G. (1972). On systems with coupled chemical reactions and diffusion. *Trans. ASME, J. Dynamic Systems, Measurement and Control* **94**:239-248.

6. Oster, G. F., Perelson, A. S. and Katchalsky, A. (1973). Network thermodynamics: Dynamic modeling of biophysical systems. *Quart. Rev. Biophys.* **6**:1-134.

7. Oster, G. F. and Perelson, A. S. (1973). Systems, circuits and thermodynamics. *Israel J. Chem.* **11**:445-478.

8. Oster, G. F. and Perelson, A. S. (1974). Chemical reaction dynamics, I: Geometric structure. *Arch. Rational Mech. Anal.* **55**:230-274.

9. Perelson, A. S. and Oster, G. F., (1974). Chemical reaction dynamics, II. Network structure. *Arch. Rational Mech. Anal.* **57**:31-98.

10. Oster, G. F. and Perelson, A. S. (1974). Chemical reactions networks. *IEEE Trans. Circuits and Systems* **CAS-21**:709-721.

11. Perelson, A. S. (1975). Bond graph sign conventions. *Trans. ASME, J. Dynamic Systems, Measurement and Control* **97**:184-188.

12. Perelson, A. S. (1975). Bond graph junction structures. *Trans. ASME, J. Dynamic Systems, Measurement and Control* **97**:189-195.

13. Perelson, A. S. (1975). Network thermodynamics: an overview. *Biophysical J.* **15**:667-685.

14. Perelson, A. S. and DeLisi, C. (1975). A systematic and graphical method for generating the kinetic equations governing the growth of aggregates. *J. Chem. Phys.* **62**:4053-4061.

15. Perelson, A. S. (1976). A note on the qualitative theory of lumped parameter systems. *Chem. Eng. Sci.* **31**:170-173.

16. Perelson, A. S. (1976). The properties of bond graph junction structure matrices. *Trans. ASME, J. Dynamic Systems, Measurement and Control* **98**:209.

17. Perelson, A. S. (1976). Description of electrical networks using bond graphs. *Int. J. Circuit Theory and Applications* **4**:107-123.

18. Perelson, A. S. and Oster, G. F. (1976). On the application of network theory to nonisothermal systems. *Int. J. Circuit Theory and Applications* **4**:299-305.

19. Perelson, A. S. and DeLisi, C. (1976). An infinite system of nonlinear differential equations. *SIAM Review* **18**:296-298.

20. DeLisi, C. and Perelson, A. S. (1976). The kinetics of aggregation phenomena: I. Minimal models for patch formation on Lymphocytes. *J. Theoret. Biol.* **62**:159-210.

21. Perelson, A. S. (1976). Biophysics. *1976 McGraw–Hill Yearbook of Science and Technology.* McGraw–Hill, NY.

22. Perelson, A. S. (1976). Remarks on conservation of mass in open chemical reaction systems. *J. Theoret. Biol.* **63**:233-237.

23. Perelson, A. S. and Oster, G. F. (1976). Bond graphs and linear graphs. *J. Franklin Inst.* **302**:159-185.

24. Wallwork, D. and Perelson, A. S. (1976). Restrictions on chemical kinetic models. *J. Chem. Phys.* **65**:284-292.

25. Goldstein, B. and Perelson, A. S. (1976). The electrophoretic hemolytic plaque assay–theory. *Biophysical Chem.* **4**:349-362.

26. Perelson, A. S., Mirmirani, M. and Oster, G. F. (1976). Optimal strategies in immunology, I.: B-cell differentiation and proliferation. *J. Math. Biol.* **3**:325-367.

27. Perelson, A. S. and Bell, G. I. (1977). Mathematical models for the evolution of multigene families by unequal crossing–over. *Nature* **265**:304-310.

28. Perelson, A. S. and Goldstein, B. (1977). Antigen modulation of antibody forming cells: The relationship between direct plaque size, antibody affinity and antibody secretion rate. *J. Immunol.* **118**:1649-1654.

29. Goldstein, B. and Perelson, A. S. (1977). The hemolytic plaque assay: Theory for finite layers. *Biophysical Chem.* **7**:15-32.

30. Perelson, A. S. and Wallwork, D. (1977). The arbitrary dynamic behavior of open chemical reaction systems. *J. Chem. Phys.* **66**:4390-4394.

31. Perelson, A. S. (1978). Models of the events responsible for antibody production by B lymphocytes. In: *Theoretical Immunology*, Bell, G. I., Perelson, A. S., and Pimbley, G. H., Jr., eds., Marcel Dekker, New York, pp. 171-213.

32. Bell, G. I. and Perelson, A. S. (1978). An historical introduction to theoretical immunology. In: *Theoretical Immunology*, Bell, G. I., Perelson, A. S., and Pimbley, G. H., Jr., eds., Marcel Dekker, New York, pp. 3-41.

33. Perelson, A. S., Mirmirani, M. and Oster, G. F. (1978). Optimal strategies in immunology, II. B memory cell production. *J. Math. Biol.* **5**:213-256.

34. Perelson, A. S. (1978). Spatial distribution of immunoglobulin receptors on B lymphocytes: Local ordering. *Expt. Cell Res.* **112**:309-321.

35. Perelson, A. S. and Segel, L. A. (1978). A singular perturbation approach to diffusion reaction equations containing a point source, with application to the hemolytic plaque assay. *J. Math. Biol.* **6**:75-85.

36. Perelson, A. S. (1978). The IgM–IgG switch looked at from a control theoretic viewpoint. In: *Lecture Notes in Control and Information Sciences, Vol. 6: Optimization Techniques, Proc. 8th IFIP Conference on Optimization Techniques, Würzburg, Sept. 1977, Part 1*, J. Stoer, ed. Springer-Verlag, Berlin, pp. 431-440.

37. Perelson, A. S. (1978). Applications of optimal control theory to immunology. In: *Recent Developments in Variable Structure Systems, Economics and Biology,* R. R. Mohler and Ruberti, A., eds. Springer-Verlag, New York, pp. 272-287.

38. Perelson, A. S. (1979). Stochastic models for the evolution of multigene families. *Rocky Mountain J. Math.* **9**:115-130.

39. Goldstein, B. and Perelson, A. S. (1979). The effect of indicator layer thickness on the interpretation of hemolytic plaque results. *Molec. Immunol.* **16**:395-400.

40. Perelson, A. S. (1979). Optimal strategies for an immune response. In: *Some Mathematical Questions in Biology, Vol. X*, S. Levin, ed. Amer. Math. Soc., Providence, RI, pp. 109-163.

41. Perelson, A. S. and Wiegel, F. (1979). A calculation of the number of IgG molecules required to fix complement. *J. Theoret. Biol.* **79**:317-332.

42. Perelson, A. S. and Oster, G. F. (1979). Theoretical studies of clonal selection: Minimal antibody repertoire size and reliability of self–non-self discrimination. *J. Theoret. Biol.* **81**:645-670.

43. Perelson, A. S. (1979). A model for the reversible binding of bivalent antigen to cells. In: *Physical Chemical Aspects of Cell Surface Events in Cellular Regulation*, C. DeLisi and R. Blumenthal, eds. Elsevier/North Holland, Amsterdam, pp. 147-161.

44. Perelson, A. S. (1980). Chaos. In: *Mathematical Models in Molecular and Cellular Biology*, L. A. Segel, ed. Cambridge University Press, Cambridge, pp. 349-364.

45. Perelson, A. S. (1980). Mathematical immunology. In: *Mathematical Models in Molecular and Cellular Biology*, L. A. Segel, ed. Cambridge University Press, Cambridge, pp. 365-439.

46. Albert, A., Freedman, M. and Perelson, A. S. (1980). Tumors and the immune system: The effects of a tumor growth modulator. *Math. Biosciences* **50**,25–58.

47. Perelson, A. S., Goldstein, B. and Rocklin, S. (1980). Optimal strategies in immunology. III. The IgM-IgG switch. *J. Math. Biol.* **10**,209–256.

48. Perelson, A. S. and DeLisi, C. (1980). Receptor clustering on a cell surface. I. Theory of receptor cross–linking by ligands bearing two chemically identical functional groups. *Math. Biosciences* **48**,71–110.

49. Perelson, A. S. (1980). Receptor clustering on a cell surface. II. Theory of receptor cross-linking by ligands bearing two chemically distinct functional groups. *Math. Biosciences* **49**,87–110.

50. Perelson, A. S. (1981). Receptor clustering on a cell surface. III. Theory of receptor cross-linking by multivalent ligands: Description by ligand states. *Math. Biosciences* **53**,1–39.

51. Wiegel, F. W. and Perelson, A. S. (1981). Configurations of a polymeric antigen adsorbed to a B cell membrane. *J. Theoret. Biol.* **88**, 533–568.

52. Perelson, A. S. and Wiegel, F. W. (1981). Theoretical considerations of the role of antigen structure in B cell activation. *Fed. Proc.* **40**, 1479–1483.

53. Perelson, A. S., DeLisi, C. and Siraganian, R. (1982). A method for determining whether the descending limb of a biphasic histamine release curve reflects insufficient cross–linking. *Molec. Immunol.* **19**:13-20.

54. Samsel, R. W. and Perelson, A. S. (1982). Kinetics of rouleau formation I. A mass action approach with geometric features. *Biophysical J.* **37**:493-514.

55. Perelson, A. S. and Wiegel, F. W. (1982). The equilibrium size distribution of rouleaux. *Biophysical J.* **37**:515-522.
